**Video Converter**

**Coaxial/Fiber Optic Converter**

UNICOM's Video/Fiber converter is designed to convert baseband video signal to Multi-Mode fiber optic. The Converter Kit comes with Transmitter and Receiver and must be used in pairs. It can easily extend your video signal up to 2,500 meters. Linear modulation and wideband low noise circuit design assures transmission quality meets NTSC, PAL, SECAM and D2MAC specifications. For the maximum extended distance, just install or use your existing fiber optic cable for your next video extension.
